When their clients requested an entertainment system that wouldn't come between them and the 270-degree views of the sprawling urban scenery outside their penthouse master bedroom window, Charlotte Dunagan and Tom Diverio of Dunagan Diverio Design Group in Coral Gables reached out to home automation authority Visual Acoustics. Owner Marc Lewin designed the elegant-yet-simple home theatre solution that delivered a retractable, motorized, 130-inch screen from Stewart Film-screen and an Epson Home Cinema Full HD projector that transmits bright and vivid imagery the couple can enjoy any time of day. Sonance speakers were installed in the ceiling then tilted to direct the audio toward the audience; a subwoofer beneath the bed completes the 7.1 surround sound experience; [dunagandiverio.com](http://dunagandiverio.com)
